DATE MAILED: 06/16/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

<b>Office Action Summary</b>	<b>Application No.</b> 09/892,344	<b>Applicant(s)</b> KOMSI ET AL.	
	<b>Examiner</b> Thanh T. Vu	<b>Art Unit</b> 2174	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) ☒ Responsive to communication(s) filed on 14 March 2005.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

#### Disposition of Claims

- 4) ☒ Claim(s) 1-18 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-18 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

#### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

#### Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All    b) ☐ Some \*    c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

### **DETAILED ACTION**

This communication is responsive to Amendment, Filed 03/14/2005.

Claims 1-18 are pending in this application. In the Amendment, claims 1-4, 7, 8, 14, and 16-18 were amended.

#### ***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 2 and 8 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The language of the claims raise a question as to whether the claim is directed merely to an abstract idea that is not tied to a technological art, environment or machine which would result in a practical application producing a concrete, useful, and tangible result to form the basis of statutory subject matter under 35 U.S.C 101.

Claims 3-4, and 14 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter as not being tangibly embodied in a manner so as to be executable.

Claims 17 and 18 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory for at least the reason that it is not tangibly embodied in a manner so as to be executable. Further, the claims are directed merely to an abstract idea of non-functional descriptive material.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-8, 10-12, 14-18 are rejected under 35 U.S.C. 102(e) as being anticipated by Bickmore et al. ("Bickmore", U.S. Pat. No. 6,466,213).

Per claim 1, Bickmore teaches a system for implementing entity bookmarks, comprising:  
an entity (*the examiner considers the entity as the electronic document 112 or 600 having avatar links* see, figs. 1 and 13; col. 10, lines 1-9, lines 39-43) that comprises a message component (col. 4, lines col. 2, lines 33-40; col. 7, lines 31-42) that comprises a package of content and functionality having a plurality of components that are suitable for storage in a memory device (col. 7, lines 23-42, and lines 46-67; col. 8, lines 47-64; col. 10, lines 31-39), one of said components comprising an addressing mechanism that comprises a representation of at least one address (*the examiner considers an addressing mechanism that comprises representation of at least one address as various avatars links* (see col. 9, lines 13-30 and lines 40-55 and col. 10, lines 40-54));

Art Unit: 2174

a selectable resource wherein the resource is accessible via the addressing mechanism and means for selecting the resource (col. 2, lines 31-45; col. 9, lines 13-30 and lines 40-53; col. 10, lines 48-67).

Per claim 2, Bickmore teaches a method for implementing entity bookmarks, comprising: selecting an identifier associated with a resource (col. 2, lines 31-45; col. 9, lines 13-30 ; col. 10, lines 48-67);

associating the identifier with an entity bookmark, wherein the resource is accessed by selecting the entity bookmark (col. 2, lines 31-45; col. 9, lines 13-30 and lines 40-53; col. 10, lines 48-67), and wherein an entity (*the examiner considers the entity as the electronic document 112 or 600 having avatar links* see, figs. 1 and 13; col. 10, lines 1-9, lines 39-43) comprises a message component (col. 4, lines col. 2, lines 33-40; col. 7, lines 31-42) that comprises a package of content and functionality that is provide so as to comprise a plurality of components that are suitable for storage in a memory device (col. 7, lines 23-42, and lines 46-67; col. 8, lines 47-64; col. 10, lines 31-39, one of said components comprising said entity bookmark (col. 9, lines 13-30 and lines 40-55 and col. 10, lines 40-54).

Per claim 3, Bickmore teaches an entity (*the examiner considers the entity as the electronic document 112 or 600 having avatar links* see, figs. 1 and 13; col. 10, lines 1-9, lines 39-43) comprising a message component (col. 4, lines col. 2, lines 33-40; col. 7, lines 31-42) that comprises a package of content and functionality (col. 7, lines 23-42, and lines 46-67; col. 10, lines 31-44) and further, comprising:

Art Unit: 2174

media pool (col. 2, lines 31-53);

body (figs 4-6; col. 10, lines 50-54);

at least one entity method (col. 7, lines 43-67; col. 8, lines 47-64); and

at least one bookmark, wherein the bookmark provides an addressing mechanism that comprises a representation of at least one address (col. 2, lines 31-45; col. 7, lines 23-42; col. 9, lines 13-30 and lines 45-53; col. 10, lines 40-50; *The examiner considers the bookmark provides an addressing mechanism that comprises representation of at least one address as various avatars links* (col. 9, lines 13-30 and lines 40-55 and col. 10, lines 40-54)).

Per claim 4, Bickmore teaches an entity (*the examiner considers the entity as the electronic document 112 or 600 having avatar links* see, figs. 1 and 13; col. 10, lines 1-9, lines 39-43) comprising a message component (col. 4, lines col. 2, lines 33-40; col. 7, lines 31-42) that comprises a package of content and functionality (col. 7, lines 23-42, and lines 46-67; col. 10, lines 31-44) and that further, comprising:

a media pool (col. 2, lines 31-53);

a body (figs 4-6; col. 10, lines 50-54);

a brain (col. 3, lines 45-52; col. 4, lines 7-16; col. 7, lines 23-42);

at least one entity method (col. 7, lines 30-67; col. 8, lines 64) and

at least one bookmark, wherein the bookmark provides an addressing that comprises a representation of at least one address (col. 2, lines 31-45; col. 7, lines 23-42; col. 9, lines 13-30 and lines 45-53; col. 10, lines 40-50; *The examiner considers the bookmarks provides an*

Art Unit: 2174

*addressing mechanism that comprises representation of at least one address as various avatars links* (col. 9, lines 13-30 and lines 40-55 and col. 10, lines 40-54)).

Per claim 5, Bickmore teaches the system of claim 1 wherein the addressing mechanism provides a link to a universal resource identifier (URI) (col. 9, lines 28-31).

Per claim 6, Bickmore teaches the method of claim 2, wherein the identifier is a universal resource identifier (URI) (col. 9, lines 28-31).

Per claim 7, Bickmore teaches a system for entity messaging, comprising:

an entity (*the examiner considers the entity as the electronic document 112 or 600 having avatar links* see, figs. 1 and 13; col. 10, lines 1-9, lines 39-43) comprising a message component (col. 4, lines col. 2, lines 33-40; col. 7, lines 31-42) that comprises a package of content and functionality (col. 7, lines 23-42, and lines 46-67; col. 10, lines 31-44) and that further comprises a plurality of components that are suitable for storage in a memory device, one of said components comprising an addressing mechanism that comprises a representation of at least one address (col. 2, lines 31-45; col. 7, lines 23-42; col. 9, lines 13-30 and lines 45-53; col. 10, lines 40-50; *The examiner considers an addressing mechanism that comprises representation of at least one address as various avatars links* (col. 9, lines 13-30 and lines 40-55 and col. 10, lines 40-54));

an entity-enabled device for invoking the entity (col. 2, lines 31-45; col. 9, lines 13-30; col. 10, lines 43-50); and

a bookmark selection means for selecting the bookmark (col. 2, lines 31-45; col. 9, lines 13-30; col. 10, lines 43-50).

Per claim 8, Bickmore teaches a method for entity messaging, comprising:

invoking an entity (*the examiner considers the entity as the electronic document 112 or 600 having avatar links* see, figs. 1 and 13; col. 10, lines 1-9, lines 39-43) comprising a message component (col. 4, lines col. 2, lines 33-40; col. 7, lines 31-42) that comprises a package of content and functionality (col. 7, lines 23-42, and lines 46-67; col. 10, lines 31-44) and that further comprises a plurality of components that are suitable for storage in a memory device, one of said components comprising at least one bookmark associated with a resource, said at least one bookmark comprising an addressing mechanism that comprises a representation of at least one address (col. 2, lines 31-45; col. 7, lines 23-42; col. 9, lines 13-30 and lines 45-53; col. 10, lines 40-50; *The examiner considers said at least one bookmark an addressing mechanism that comprises representation of at least one address as various avatars links* (col. 9, lines 13-30 and lines 40-55 and col. 10, lines 40-54)); selecting the bookmark and accessing the resource associated with the bookmark (col. 2, lines 31-45; col. 9, lines 13-30; col. 10, lines 43-50).

Per claim 10, Bickmore teaches the system of claim 7, wherein the bookmark selection means is a link to a universal resource identifier (URI) (col. 9, lines 28-31).

Per claim 11, Bickmore teaches the system of claim 7, wherein the bookmark selection means is a shortcut to a link to a universal resource identifier (URI) (col. 9, lines 28-31).

Per claim 12, Bickmore teaches the method of claim 8, wherein the resource associated with the bookmark is a universal resource identifier (URI) (col. 9, lines 28-31).

Per claim 14, Bickmore teaches a multi-component logical entity storable in a memory medium, said logical entity (*the examiner considers the entity as the electronic document 112 or 600 having avatar links* see, figs. 1 and 13; col. 10, lines 1-9, lines 39-43) comprising a message component (col. 4, lines col. 2, lines 33-40; col. 7, lines 31-42) that comprises a package of

Art Unit: 2174

content and functionality (col. 7, lines 23-42, and lines 46-67; col. 10, lines 31-44) and that further comprising:

- a media pool component (col. 2, lines 31-53);
- a body component (figs 4-6; col. 10, lines 50-54);
- a brain component (col. 3, lines 45-52; col. 4, lines 7-16; col. 7, lines 23-42);
- at least one entity method component (col. 7, lines 30-67; col. 8, lines 64) and
- at least one bookmark component, wherein said bookmark component comprises at least one universal resource identifier (URI) for enabling a user of the entity to access a link associated with the URI (col. 2, lines 31-45; col. 7, lines 23-42; col. 9, lines 13-30 and lines 45-53; col. 10, lines 40-50).

Per claim 15, Bickmore teaches a multi-component logical entity storable in a memory medium as in claim 14, where the URI is represented by a shortcut to the URI (col. 9, lines 28-31).

Per claim 16, Bickmore teaches a multi-component logical entity storable in a memory medium as in claim 14, where the URI point to a location that stores content that comprises at least part of said media pool component (col. 9, lines 28-31; col. 10, lines 48-67).

Per claim 17, Bickmore teaches a multi-component logical entity storable in a memory medium said entity (*the examiner considers the entity as the electronic document 112 or 600 having avatar links* see, figs. 1 and 13; col. 10, lines 1-9, lines 39-43) comprising a message component (col. 4, lines col. 2, lines 33-40; col. 7, lines 31-42) that comprises a package of content and functionality (col. 7, lines 23-42, and lines 46-67; col. 10, lines 31-44), where said

Art Unit: 2174

entity is received over a wireless communications channel as part of a message (col. 12, lines 28-33).

Per claim 18, Bickmore teaches a multi-component logical entity storable in a memory medium, said entity (*the examiner considers the entity as the electronic document 112 or 600 having avatar links* see, figs. 1 and 13; col. 10, lines 1-9, lines 39-43) comprising a message component (col. 4, lines col. 2, lines 33-40; col. 7, lines 31-42) that comprises a package of content and functionality (col. 7, lines 23-42, and lines 46-67; col. 10, lines 31-44), where said entity is transmitted to a wireless communications channel as part of a message (col. 12, lines 28-33).

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 9 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bickmore et al. ("Bickmore", U.S. Pat. No. 6,466,213) in view of Praitis et al. ("Praitis", U.S. Pat. No. 6,594,697).

Per claim 9, Bickmore teaches the system of claim 7, but does not teach the bookmark selection means further comprises error handling means for determining whether the bookmark selection fails. However, Praitis teaches the bookmark selection means further comprises error handling means for determining whether the bookmark selection fails (col. 2, lines 25-45).

Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to include error handling as taught by Praitis in the invention of Bickmore in order to provide users a friendly user interface by providing useful information regarding the errors.

Claim 13 is rejected under the same rationale as claim 9.

### ***Response to Arguments***

Applicants' arguments in the Amendment have been fully considered but are not persuasive.

Applicant's primary argument is that Bickmore does not teach an entity comprising a message component that comprises a package of content and functionality having a plurality of components that are suitable for storage in a memory device.

The examiner does not agree for the following reasons:

During patent examination, the pending claims must be "given >their< broadest reasonable interpretation consistent with the specification." > In re Hyatt, 211 F.3d 1367, 1372, 54 USPQ2d 1664, 1667 (Fed. Cir. 2000). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Applicant always has the opportunity to amend the claims during prosecution, and broad interpretation by the examiner reduces the possibility that the claim, once issued, will be interpreted more broadly than is justified. In re Prater, 415 F.2d 1393, 1404-05, 162 USPQ 541, 550-51 (CCPA 1969).

In this case, the claim recites an entity comprising a message component that comprises a package of content and functionality having a plurality of components that are suitable for

Art Unit: 2174

storage in a memory device. Bickmore's reference reads on the limitations of an entity (*the examiner considers the entity as the electronic document 112 or 600 having avatar links see, figs. 1 and 13; col. 10, lines 1-9, lines 39-43*) that comprises a message component (col. 4, lines col. 2, lines 33-40; col. 7, lines 31-42) that comprises a package of content and functionality having a plurality of components that are suitable for storage in a memory device (col. 7, lines 23-42, and lines 46-67; col. 8, lines 47-64; col. 10, lines 31-39).

### ***Inquiries***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thanh T. Vu whose telephone number is (571) 272-4073. The examiner can normally be reached on Mon-Thur and every other Fri 8:30 AM - 6:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kristine L. Kincaid can be reached on (571) 272-4063. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
